

Sprott Global Infrastructure Fund

SEMI-ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

JUNE 30

2016

The interim management report of fund performance is an analysis and explanation that is designed to complement and supplement an investment fund's financial statements. This report contains financial highlights but does not contain the complete interim financial statements of the investment fund. You can get a copy of the interim financial statements at your request, and at no cost, by calling 1-866-299-9906, by visiting our website at www.sprott.com or SEDAR at www.sedar.com or by writing to us at: Sprott Asset Management LP, Royal Bank Plaza, South Tower, 200 Bay Street, Suite 2700, P.O. Box 27, Toronto, Ontario M5J 2J1. Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Investment Objective and Strategies

The objective of the Sprott Global Infrastructure Fund (the “Fund”) is primarily to maximize risk adjusted long-term returns and secondarily to achieve a high level of income. The Fund focuses on achieving growth of capital through securities selection and pursues a long-term investment program with the aim of generating capital gains. The Fund seeks to provide a moderate level of volatility and a low degree of correlation to other asset classes through diversifying across a relatively concentrated group of global infrastructure stocks.

As part of its investment strategy, the Fund may:

- invest across all geographical sectors; and
- engage in short selling up to 20% of the Fund’s total net asset value as a result of special relief it obtained from Canadian securities regulators.

On April 1, 2014, Sprott Asset Management LP (the “Manager”) acquired the management rights for the Fund from Blumont Capital Corporation. Capital Innovations, LLC continues to be the sub-advisor for the Fund. Information prior to the acquisition by the Manager is presented in this report, as required.

Risks

The risks of investing in the Fund are described in the Fund’s simplified prospectus. This Fund is suitable for those investors who are seeking long-term appreciation potential of the global infrastructure and have a medium risk tolerance. There were no significant changes to the investment objective and strategies that affected the Fund’s overall level of risk during the reporting period.

Results of Operations

The Fund, Series A gained 6.2% during the first six months of 2016, compared to the 7.6% return of the Macquarie Global Infrastructure 100 Index.

Macroeconomic factors affecting the Fund over the period were a bottoming of oil prices, a plateau in U.S. dollar strength, and continued low interest rates. In response to those events, the Fund continued to be overweight the energy sector, with a focus on companies with increased leverage to higher oil prices. These positions were balanced against more defensive, higher-yielding securities.

Throughout the first half of the year, the Fund actively increased its weightings in pipeline operators in the energy sector due to their low-risk cash flows and growth due to expanding energy prices. The Fund also took profits throughout the year in the industrials sector due to high valuations.

The energy sector was the top contributor to performance for the period, while Telecommunication Services detracted from performance.

Both of the top two contributors to the Fund, TransCanada Corp. and Spectra Energy Corp., are in the energy sector and benefitted from rising energy prices. In addition, TransCanada Corp. benefitted from a lower tax rate and beating earnings expectations, while Spectra Energy Corp. outperformed due to low-risk cash flows and visible growth.

The top detractors from the Fund’s performance, Williams Companies Inc. and Groupe Eurotunnel SE, were both negatively impacted by a ruling and vote outside of normal business operations. A judge ruled that rival ETE could back out of their \$33 billion deal to acquire Williams Companies Inc.. In England, the vote by the U.K. to leave the European Union caused concerns about Groupe Eurotunnel SE’s revenues due to decreased travel between Europe and the U.K.

The Fund’s net asset value decreased by 21.7% during the period, from \$21.1 million as at December 31, 2015 to \$16.5 million as at June 30, 2016. This change was predominantly due to net redemptions of \$5.3 million. The management expense ratio increased slightly and the portfolio turnover rate decreased compared to the prior period.

Sprott Global Infrastructure Fund

June 30, 2016

Related Party Transactions

MANAGEMENT FEES

The Fund pays a management fee to the Manager, at an annual rate of 2.0% for Series A units, 1.0% for Series F units and as negotiated by the unitholders for Series I. The management fee is calculated and accrued daily and is paid monthly based on the daily net asset value of that series of the Fund. For the six-month period ended June 30, 2016, the Fund incurred management fees of \$112,867 (including taxes). The breakdown of the services received in consideration of the management fees, as a percentage of management fees, is as follows:

	Portfolio Advisory	Trailing Commissions
Sprott Global Infrastructure Fund – Series A	57%	43%
Sprott Global Infrastructure Fund – Series F	100%	–
Sprott Global Infrastructure Fund – Series I	100%	–

Out of the management fees that the Manager received from the Fund, the Manager paid trailer commissions of \$476 during the six-month period ended June 30, 2016 to Sprott Private Wealth LP, an affiliate of the Manager.

OPERATING EXPENSES

The Fund pays its own operating expenses, which include, but are not limited to, audit, legal, custodial, trustee, filing and administrative expenses as well as unitholder reporting costs. The Manager pays certain of these expenses on behalf of the Fund and then is reimbursed by the Fund. Amounts waived or absorbed by the Manager are reported in the Statements of Comprehensive Income. Waivers or absorptions can be terminated at any time without notice. The Manager did not absorb any expenses during the six-month period ended June 30, 2016.

OTHER RELATED PARTY TRANSACTIONS

The Fund relied on the approval, positive recommendation or standing instruction from the Fund's Independent Review Committee with respect to any related party transactions.

1 This information is derived from the Fund's interim and audited annual financial statements. Information related to year 2013 and all periods onwards has been prepared in compliance with International Financial Reporting Standards ("IFRS") as published by the International Accounting Standards Board. Information related to all periods prior to January 1, 2013 has been prepared in compliance with Canadian generally accepted accounting principles ("Canadian GAAP") as defined in Part V of the Chartered Professional Accountants of Canada Handbook – Accounting. Under Canadian GAAP, the Fund was required to use bid prices for valuing long positions and ask prices for short positions. As such, the net assets per unit presented in the financial statements may differ from the net asset value calculated for transaction purposes prior to conversion to IFRS.

2 The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. Net assets and distributions are based on the actual number of units outstanding at the relevant time. This table is not intended to be a reconciliation of beginning to ending net assets per unit.

3 Distributions were reinvested in additional units of the Fund.

4 Information provided is for the period from September 20, 2011 to December 31, 2011 for Series A and for September 1, 2011 (launch date) to December 31, 2011 for Series F.

5 Information provided is for the period from July 17, 2014 (first issuance) to December 31, 2014.

6 The final allocation of distributions for the period ended June 30, 2016 between income, dividends, capital gains and return of capital will be determined at December 31, 2016.

1 The information is provided as at June 30, 2016 and December 31 of the years shown prior to 2016.

2 Management expense ratio ("MER") is based on total expenses (including incentive fees, if any; excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.

3 The Manager may waive or absorb a portion of the operating expenses of the Fund. Waivers and absorption can be terminated at any time.

4 The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The TER includes dividend expense and securities borrowing expense paid by the Fund in connection with securities sold short.

5 The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

Past Performance

The indicated rates of return are the historical total returns including changes in unit values and assume reinvestment of all distributions in additional units of the relevant Series of the Fund. These returns do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that may reduce returns. Please note that past performance is not indicative of future performance. All rates of return are calculated based on the Net Asset Value of the particular Series of the Fund.

Year-by-Year Returns

The following chart indicates the performance of each Series of the Fund for the six-month period ended June 30, 2016 and each of the previous twelve-month periods ended December 31 shown, unless otherwise noted. The chart shows, in percentage terms, how much an investment made on the first day of each period would have grown or decreased by the last day of each period.

* Return from September 20, 2011 to December 31, 2011 for Series A and from September 1, 2011 to December 31, 2011 for Series F (not annualized).

** Return from July 17, 2014 to December 31, 2014 for Series I (not annualized).
